BEAUTY • QUALITY • VALUE

WOOD WALL PANELS

Precision Pools wood wall pools offer today's best value in vinyl liner pool construction. Direct burial ground contact wood products are used throughout the world in agricultural applications, sea walls, commercial and residential retaining walls and swimming pools. *Precision Pools Wood Wall Panels* carry a lifetime limited warranty. Wood wall-vinyl liner pools were introduced in the 1950's. Many of these pools are still in use today. Our wood wall panels have vertical support ribs every 2 feet and A-frame bracing every 4 feet making them one of the strongest walls available. One quarter inch thick closed cell polyethylene is permanently attached to the face of the wood panels to insulate and cushion the liner.

WALK IN STAIRS

Precision Pools liner over stairs options offer many advantages. The most appealing stair design is the full width stair across the shallow end wall. This stair can accommodate the whole family at one time. You can also choose liner over corner stairs or a variety of benches and swim outs. Since the stair is covered by the liner, it blends in as an integral part of the pool structure.

SALT CHLORINE GENERATORS

Chlorine is still the most effective sanitizer. Every municipal water system in the world uses chlorine to sanitize drinking water. As worldwide demand increases, chlorine prices have risen dramatically. Technology has made it possible to manufacture chlorine right in your own pool from a teaspoon of salt per gallon of water. This is very cost effective, and eliminates almost all problems with water balance and algae. *Precision* wood walls are impervious to corrosion from salt or chlorine, making salt chlorine generators and wood walls a perfect match.

FIREPITS & WATER FEATURES

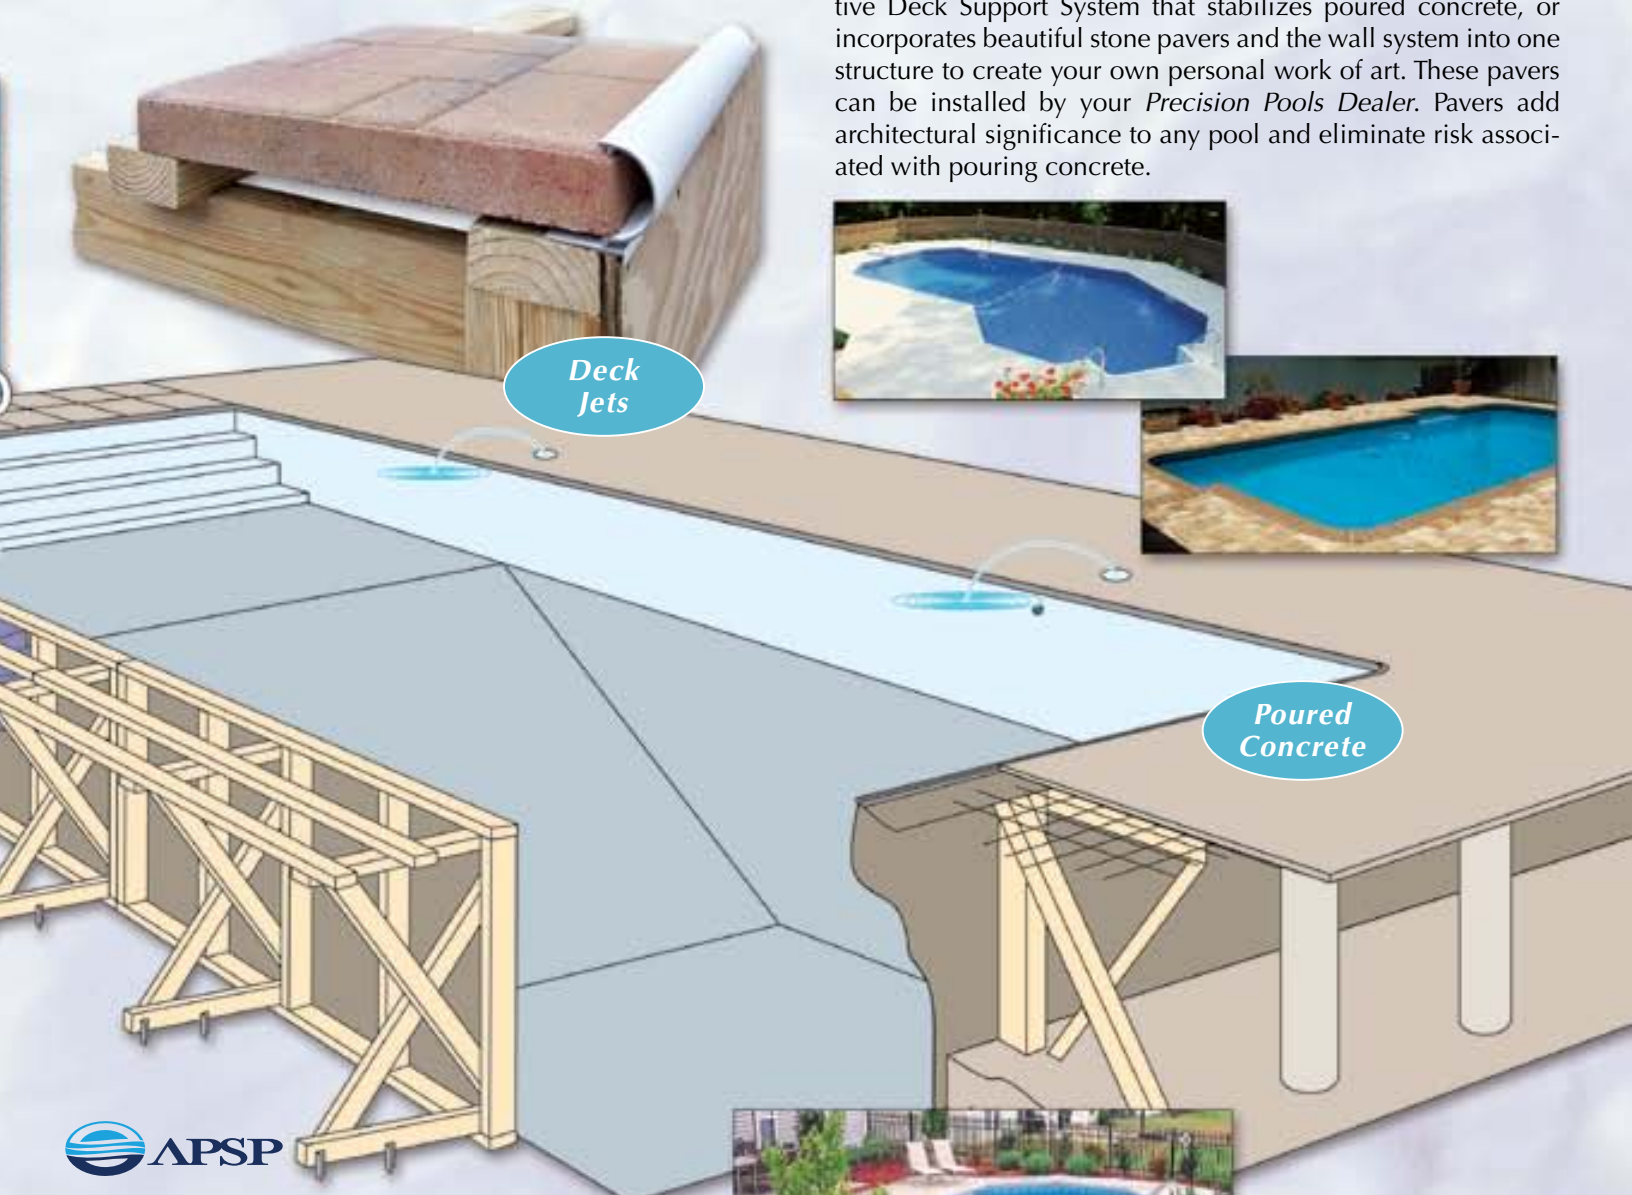

Every pool should be a year round entertainment destination. Simply add a Fire Pit, Outdoor Cooking Area, Hot Tub, and Deck Jets. Nothing beats sitting by a beautiful pool, listening to the sound of falling water, and roasting marshmallows. In November! Your *Precision Pools* dealer can build any or all of these features into your backyard paradise.

ALUMINUM COPING

Aluminum coping forms the perimeter of the pool and serves as the form for poured concrete decking. Coping also serves as the framework for custom brick or stone pavers. *Precision Pools* Aluminum Coping is available in a variety of natural colors to blend with pavers or deck treatment.

THE POOL DECK

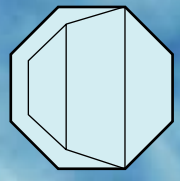

An important element of any pool construction is the quality and integrity of the deck surrounding the pool. A poured concrete deck is one option. Another popular option is paving stones. Deck support bracing is critical for either installation. All *Precision Pools* are available with an affordable and very effective Deck Support System that stabilizes poured concrete, or incorporates beautiful stone pavers and the wall system into one structure to create your own personal work of art. These pavers can be installed by your *Precision Pools Dealer*. Pavers add architectural significance to any pool and eliminate risk associated with pouring concrete.

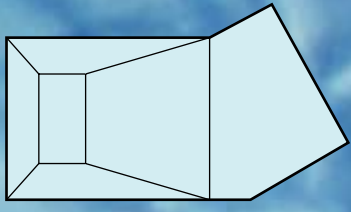

ALUMINUM FENCING

County codes and insurance companies will require that you fence your pool. Your *Precision Pools Dealer* offers top quality aluminum fencing with a lifetime warranty. All *Precision* aluminum fencing has baked on enamel finish, self closing gates and latches, and meets all safety codes for swimming pool fencing. No painting, no maintenance, ever. The best part is you only have to deal with one contractor to complete the job.

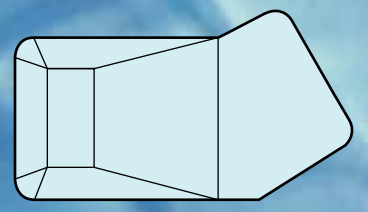

Your Precision Pool Dealer has blueprints available for over 70 shapes and sizes, or you can design your own unique pool.

Your Authorized Precision Pool Dealer Is:

The dealer or contractor who sells your pool is an independent contractor and is not an agent or employee of Johnson Products Co. Johnson Products Co. does not manufacture slides, diving boards, or any other diving equipment. Any use of such equipment must be in strict compliance with the equipment manufacturers' specifications, the National Spa & Pool Institute's standards, as well as local building codes and regulations. In some pictures, the safety line rope and floats have been removed from the pool for photographic purposes. The safety line should be permanently attached to the pool at all times. We also urge you to use handrails and grabrails according to NSPI standards.
